Overhead Crane Ticket BC

Overhead Crane Ticket BC - The overhead crane is a common heavy equipment utilized in industrial settings. This particular equipment is called a bridge crane and comprises parallel runways spanned by a traveling bridge. The hoist is the part which lifts materials. The hoist travels along the bridge.

Overhead cranes differ from mobile or construction cranes in which overhead models are utilized for manufacturing or maintenance applications where efficiency is critical. The steel business usually requires overhead cranes. Steel is handled using an overhead crane at each stage of the manufacturing process, from the time the raw materials are poured into the furnace up to the time the finished coils are lifted onto trains and trucks.

The overhead crane can also be found in the auto industry and paper industry. The bridge cranes can help remove the heavy press rolls and other equipment at paper mills. Bridge cranes are utilized to install the heavy cast iron paper drying drums as well as various massive equipment used in paper mills.
