Forklift Training Guidelines
The checklist below is vital for whatever workplace that has lift trucks on the premises. Each of these questions must be answered with "yes" if all the safety regulations and rules are being followed. A "no" to any question indicates a procedural flaw that can cause injury, damage to machine or accident.

1) Is the traffic of the pedestrians separate from the operating are of the forklift?
2) Is pedestrian access to forklift travel areas restricted by barriers?
3) The pedestrian walkways well-marked?
4) A sign is clearly visible stating a "lift truck in operation"?
5) Are mirrors for drivers and pedestrians provided at blind spots?
6) Are alterations to daily forklift schedules communicated to all affected employees?
7) The lift truck tires being utilized are suitable for all operating surfaces?
8) Forklift seatbelt is being used?
9) Is the seat in good condition?
10) The maintenance schedule of the forklift is being followed?
11) Is a yearly forklift certification and inspection carried out?
12) Is the forklift right for the needed tasks?
13) Does forklift has a readable load chart?
14) Do all operators understand how to read the load chart?
15) The chart lists the safe lifting capacity for all attachments and their uses?
16) Are the warning devices on the forklift working correctly?
17) The speed operating control device is secured right?
18) The lift truck overhead cage is fitted right?
19) Do the operators of the forklift have certifications to operate the machine?
20) Speed limits and warning signs are being observed?
21) The operators have current training for the lift trucks being utilized?
22) Do operators know their responsibilities to report any equipment damage and lift truck accidents?
23) Prior to the equipment being used, the pre-test checklist is being reviewed each day?
