

Clark Forklift

Clark Forklift Forklift Training - Performing worldwide, there are at this time 350,000 Clark forklifts and lift trucks in operation, with upwards of 250,000 of those operating in North America. Clark has five major lines of lift trucks across the globe, making it one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 particular components built for 20 exclusive designs of lift trucks and automated equipment. Your regional Clark Dealer is your complete source for availability of all your parts requirements offered by Clark Totalift.

Clark has a exceptional Parts Distribution team. The items warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their buyers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Motivated to offer the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing efficiency and benefiting performance.

Internationally, Clark has one of the most amazing supplier support networks. With over 550 locations globally, seller representation in over 80 nations and 230 locations in North America, their high level of commitment to their clients predominates the materials handling market.

Clark proudly remains an innovative leader of the industrial equipment industry, revolutionizing safety features such as the worker restraint system. This exceptional dedication to safety is currently a customary feature on every forklift.

Clark's relentless effort to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first lift truck manufacturer across the world to be certified with the globally accepted quality standard ISO 9001 for every one of their production plants. Additionally, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental restrictions, thus placing them in a dominant industry position.

Resource Efficient Production

Clark has selected the structure of "Lean Production" at all of its assembly plants for the reason that this technique is extremely economical and enables minimal use of resources. Developed to ensure maximum efficiency, this system is designed to discover and acknowledge the most efficient ways for production plant stewardship. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Engineering

Clark's product engineers and suppliers join together to perfect the efficiency and brilliance of their merchandise while minimizing costs. The new value engineering program combines modern product growth and provides superior customer support and service within the industry.
